An evening with

Vandana Shiva

New GMOs, Biodiversity, Food:
the view of an Alternative Nobel
Prize winner on our current
and future challenges

15 May 2023 • 7 PM
Brussels, Flagey cultural center

Public lecture in English

The founding members of Artemisia are happy to invite you to a unique evening in the presence of Vandana Shiva.

Ten years after her last visit to Belgium, the world-renowned Indian environmental activist returns to Brussels. On May 15, she will speak in the great hall of Flagey on hot current topics.

From the new generation of GMOs to the marketing of seeds, Vandana Shiva will deliver her vision of a desirable future, taking care of our Planet and its inhabitants.

Dr. Vandana Shiva has worked on the promotion of sustainable agriculture and biodiversity for over 40 years. She is the founder of the Navdanya organization, dedicated to the protection of traditional seed varieties and organic agriculture. Simultaneously a teacher, lecturer, writer, activist, environmentalist and feminist, her struggles and successes have led to her recognition as one of the seven most powerful women in the world (*Forbes Magazine*, 2010). In 1993, she received the alternative Nobel Prize "*for placing women and ecology at the heart of modern speech*".

As the EU is about to publish two legislative proposals that are crucial for the future of our agriculture, and at a time when genetic modification techniques have evolved considerably, **what are the challenges for our health, our rights and our food?**
